

FILM, VIDEO, AUDIO & SLIDES TO CD/DVD CONVERSIONS

Bring your Historical Family Memories into the Digital Age

Do you have a collection of old Family Video tapes,
Films, Audio tapes or Slides hidden away?

Over years magnetic media ages and the sound
and picture quality deteriorates.

Even if videos and tapes are not used they may
still deteriorate.

TYPES OF MEDIA CONVERTED:

- Film - 8mm standard/regular and Super 8 (with or without sound)
- Film - 16 mm (with or without sound)
- VHS/Super VHS
- BETA Video/Super BETA
- Mini DV Tapes
- VHS C/Super VHS C
- 8mm Video (Standard 8, Hi 8 & Digital 8)
- Audio Cassettes
- Reel to Reel Audio Tape
- 35mm Slides
- Hard Disk Drive (HDD) Video cameras

DIGITAL FORMATS

In addition to converting to DVD or CD, Video and Audio can also be converted to Digital video or MP3 Files, which can be edited or played on a computer, tablet, mobile device or uploaded to Youtube.

File types offered

AVI, MP4, MPEG2, DivX, XviD, MOV, MP3, etc

EDITING

All conversions include very basic editing. If further editing is required, you are able to edit yourself with most standard software on a modern computer.

The DVD'S or CD'S that we produce have no special encryption or protection to prevent you from copying or editing.

For best picture quality we usually put a maximum of 90 minutes per DVD and 80 minutes per CD, which can be from multiple films, video tapes or audio tapes

**2 copies of each DVD or CD
are provided,
1 to use and the other to archive.
(Extra copies can be made if required)**

We use and supply only quality Verbatim DVD's and CD's

Final quality of the DVD/CD depends on the condition of the original film, video, tape or slides supplied.

All film and other media are returned to you.

Please note:

We cannot transfer copyright material without the permission of the copyright owner. This includes programs and footage recorded from the T.V. and music taped from the radio.
